AZALEAS

We specialize in growing Azaleas, as our climate
and soil are very well adapted to the raising of these
beautiful plants. The Azaleas we offer are well grown
under ideal conditions and are healthy and vigorous.
A visit to our nursery, or a trial order will convince
you of their high quality.

Our Azaleas are especially recommended for winter
forcing. They can also be used for garden planting
through the Eastern States, with a little winter pro-
tection.

Azaleas thrive best in a well-drained, loamy, acid
soil and require very little attention; however, they
should not be allowed to become dry.

Our Azaleas have a wonderful root system with
the soil intact and are shipped with a ball of earth.
